

Technical and Safety Guidelines of the SinoJobs Career Days

These guidelines apply to the SinoJobs Career Days, organized by the SinoJobs GmbH. In addition, the technical and safety guidelines stipulated by the lessor of the respective event venue shall apply.

Waste Disposal

Exhibitors are asked to avoid waste and to properly dispose of any generated waste that is to be expected.

Business Liability Insurance

For your own benefit, we recommend that you acquire business liability insurance.

Decorating Your Booth

Is your responsibility – your assigned booth builder is happy to assist you. When decorating your booth, consider the standards set by the other exhibition stands and remember to comply with fire regulations. Our trade fair constructors are happy to help and may be contacted via the organizer.

Electrical Installation

Upon arrangement, the booths are equipped with 1 electrical outlet, which can sustain a maximum of 2 kWh. Special requests regarding electrical installation can be met by our booth builders for an additional fee. Electrical connections by exhibitors themselves must be checked and approved by the responsible electrical installation company.

Fire Regulations

- Fire alarms and hydrants must be freely accessible at all times.
- Your booth decorations must be flame-retardant in accordance with DIN 4102.
- The use of straw, decorative greenery or similar materials is not permitted.
- Open fire on the booths is prohibited.
- Burning candles may only be set up if they are placed on a non-flammable subsurface that is twice as wide as the length of the candle.
- Hallways and stairways are emergency escape routes; no empty containers may be stored in these areas.
- Consoles, shelves, display cases or similar items may not protrude beyond the surface of the booth into the walking area.
- All installations (gas, water, electrical) may only be performed by the specialists approved for the respective exhibition grounds.
- The instructions issued by the organizer shall be followed.

Booth Construction Regulations

- The booth height is generally 2.50 m; higher trade show structures must be approved by the organizer in writing. Do not decorate your booth beyond the permissible booth height.
- Please avoid interference with other trade show booths.
- The prescribed booth construction dimensions must be adhered to, and the required aisle widths may not be restricted by you.
- If necessary, consult your assigned booth builder, who will be happy to help you solve potential problems.

Parking for Exhibitors

If traffic and parking regulations are in place for the event, exhibitors must abide by these rules and follow the instructions of the organizer or the representatives of the organizer.

Mutual consideration among exhibitors is essential. Especially car drivers should free up parking spaces for larger trucks in order to ensure smooth operation.

Power Connections

Additional connections may only be requested through our authorized trade fair construction or installation companies.

Behavior

All exhibitors are obligated to fair and competitive conduct with each other. Interests of other exhibitors may not be unreasonably affected. In individual cases, the organizer is entitled to issue the necessary directives and to exclude an exhibitor from the trade show temporarily or permanently in case of gross violations.

Insurance

We do not provide theft insurance for you. We recommend acquiring appropriate insurance. In addition, we recommend that you check whether your business liability insurance will pay for potential damages we or third parties may incur during the event due to your negligence.

We are happy to send you the supplementary technical and safety guidelines stipulated by the lessor of the respective event venue.
